

YohPal Admin Web — v5 Gap Report

Generated: 2026-06-10 | Codebase: apps/admin_web | Baseline: v4 security 94/100 | Phase 1 complete

1 — BLUEPRINT MODULE COVERAGE

Module	Blueprint Route(s)	Page	Page Guard	API Routes	Audit Log	Pagination	Status
Dashboard	/dashboard	✓	✓	—	—	—	Complete
Finance — Payouts	/finance/payouts	✓	✓	approve / hold / reject	financeAuditLogs	✗ offset	Pagination gap
Finance — Reconciliation	/finance/reconciliation	✓	✓	approve / reject	financeAuditLogs	✗ offset	Pagination gap
Finance — Risk Reviews	/finance/risk-reviews	✓	✓	approve / escalate	financeAuditLogs	✗ offset	Pagination gap
Short Video	/videos, /videos/broken	✓	✓	hide / unhide / restrict / delete	videoAuditLogs	✗ offset	Pagination gap
Creators	/creators	✓	✓	ban / suspend / trust-score	creatorAuditLogs	✗ offset	Pagination gap
Live Streaming	/live, /live/reports, /live/tips	✓	✓	terminate / rotate-rtmp / revoke-rtmp / approve / escalate / reject	liveAuditLogs	✗ offset	Pagination gap
Multistream	/multistream	✓	✓	—	—	—	Complete
Moderation	/moderation, /chat/moderation	✓	✓	approve / hide / reject / chat-hide / warn	moderationAuditLogs + chatAuditLogs	✗ offset	Pagination gap
Advertising	/advertiser, /advertiser/campaigns, /advertiser/revenue	✓	✓	approve / reject	adAuditLogs	✗ offset	Pagination gap
Polls	/polls, /polls/manage, /polls/fraud	✓	✓	close / delete / vote-approve / vote-discard	pollAuditLogs	✗ offset	Pagination gap
AI Jobs	/ai-jobs	✓	✓	requeue	aiJobLogs	✗ offset	Pagination gap
Affiliate	/affiliate, /affiliate/earnings	✓	✓	approve / discard	affiliateAuditLogs	✗ offset	Pagination gap

Support	/support	✓	✓	assign / resolve	✗ MISSING	✗ offset	Audit gap
Discovery	/discovery/featured, /discovery/trending	✓	✓	—	—	—	Complete
Search	/search	✓	✓	—	—	—	Complete
Growth	/growth	✓	✓	—	—	—	Complete
Notifications	/notifications	✓	✓	broadcast	notificationAuditLogs	—	Complete

2 — SECURITY SURFACE

Check	Result	Detail
Admin pages require auth (requirePageAdmin)	PASS — 31/31	All pages in (admin) group call requirePageAdmin(); login page correctly unguarded
API mutations use POST only	PASS — 64/64	No GET handlers found on mutation routes
API routes call requireAdmin()	PASS — 64/64	Every route.ts checks auth before accessing data; returns early on UNAUTHENTICATED/FORBIDDEN
actorUserId uses real admin UID	PASS	result.admin.uid passed to all repository calls; no hardcoded placeholder values
403 Forbidden page exists	FAIL	app/403/page.tsx is missing — wrong-role redirect lands on blank Next.js 404
Session cookie name configurable	PASS	ADMIN_SESSION_COOKIE_NAME env var used; defaults to yohpal_admin_session
10 admin roles defined	PASS	owner, moderator, finance, advertiser, polls, support, viewer, creator_manager, live_moderator, affiliate_manager
Session login/logout audit logged	PASS	adminSessionLogs written in /api/auth/login and /api/auth/logout

3 — AUDIT LOG COVERAGE

Collection	Module	Status	Gap
financeAuditLogs	Payouts, Reconciliation, Risk Reviews	✓ Present	—
moderationAuditLogs	Moderation	✓ Present	—
videoAuditLogs	Short Video	✓ Present	—
creatorAuditLogs	Creators	✓ Present	—
liveAuditLogs	Live Streaming	✓ Present	—
adAuditLogs	Advertising	✓ Present	—
pollAuditLogs	Polls	✓ Present	—
affiliateAuditLogs	Affiliate	✓ Present	—
chatAuditLogs	Chat Moderation	✓ Present	—
notificationAuditLogs	Notifications	✓ Present	—
aiJobLogs	AI Jobs	✓ Present	—
adminSessionLogs	Auth (login/logout)	✓ Present	—
supportAuditLogs	Support	✗ MISSING	assignSupportTicket and resolveSupportTicket write no audit log

Coverage: 12/13 audit collections. Support module is the only module with mutations that produce zero audit trail.

4 — PAGINATION

All 10 queue-based repositories use **offset / hard-coded .limit(100)**. No cursor-based pagination is implemented. Under load, Firestore scans grow proportionally to collection size with no load-more mechanism.

Queue / Collection	Repository	Current Limit	Cursor Pagination
Wallet Payouts	financeRepository	limit(100)	✗ Missing
Moderation Reports	moderationRepository	limit(100)	✗ Missing
Videos	videoRepository	limit(100)	✗ Missing
Creators	creatorRepository	limit(100)	✗ Missing
Live Sessions	liveRepository	limit(100)	✗ Missing
Ad Campaigns	adsRepository	limit(100)	✗ Missing
Polls	pollsRepository	limit(100)	✗ Missing
AI Video Jobs	aiJobsRepository	limit(100)	✗ Missing
Affiliate Earnings	affiliateRepository	limit(100)	✗ Missing
Chat Messages	chatAdminRepository	limit(100)	✗ Missing

lib/pagination.ts and **components/admin/LoadMoreLink.tsx** are already built in the patch codebase and ready to port.

5 — INFRASTRUCTURE & DEPLOYMENT GAPS

G1	High	app/403/page.tsx missing — wrong-role redirect destination does not exist
G2	High	lib/pagination.ts missing — no cursor encode/decode utilities; queues cannot be paginated
G3	High	Cursor pagination not applied to 10 queues — all repositories cap at limit(100) with no continuation token
G4	High	supportAuditLogs missing — assign and resolve actions in supportRepository write no audit record
G5	Medium	components/admin/LoadMoreLink.tsx missing — UI component for cursor Load More not present
G6	Medium	.env.staging.example missing — staging environment contract is undocumented
G7	Medium	scripts/admin_route_inventory.ts missing — no automated guard-coverage scan
G8	Medium	scripts/admin_smoke_tests.ts missing — no route-reachability test for all 25 modules
G9	Medium	scripts/seed_staging_admins.ts missing — staging Firestore cannot be bootstrapped with test accounts
G10	Medium	scripts/seed_admin_test_queues.ts missing — no test data for queue rendering verification
G11	Medium	scripts/action_audit_log_check.ts missing — audit log health cannot be verified automatically
G12	Medium	scripts/role_access_matrix.ts missing
G13	Medium	package.json missing scripts: validate:admin, smoke:admin, seed:staging-admins, seed:staging-queues, check:audit-logs, check:roles, staging:certify
G14	Medium	tsx devDependency missing — scripts cannot be executed without tsx runtime
G15	Low	docs/STAGING_SIGN_OFF_CHECKLIST.md missing
G16	Low	docs/ADMIN_WEB_PRODUCTION_READINESS_CHECKLIST.md missing
G17	Low	docs/ADMIN_WEB_FINAL_BLUEPRINT_COVERAGE_REPORT.md missing
G18	Low	tsconfig.json missing "types": ["node"] — process.* usage causes IDE errors in script files

6 — REMEDIATION PLAN

Priority	Gaps	Action	Source
P1 — Security	G1, G4	Create app/403/page.tsx; add supportAuditLogs writes to assignSupportTicket and resolveSupportTicket	Port from patch codebase / write inline
P1 — Scalability	G2, G3, G5	Port lib/pagination.ts and LoadMoreLink.tsx; apply cursor pagination to all 10 repositories and their pages	Port from patch codebase
P2 — Staging	G6–G14	Port all scripts/, .env.staging.example, package.json scripts, tsx devDep from patch codebase	Port from patch codebase
P3 — Docs/Config	G15–G18	Port docs/ files; fix tsconfig.json types array	Port from patch codebase

7 — SCORE DELTA

Dimension	v4 Score	v5 Score	Note
Route auth — pages	100%	100%	31/31 guarded
Route auth — APIs	100%	100%	64/64 use requireAdmin()
HTTP method safety	100%	100%	POST-only on all mutations
Audit log coverage	~90%	92% (12/13)	Support gap now formally identified
403 forbidden page	0%	0%	G1 — not yet ported
Pagination safety	0%	0%	G2/G3 — not yet applied
Staging infrastructure	0%	0%	G6–G14 — not yet ported
Overall	94/100	91/100	Score reflects newly discovered G4 (support audit) lowering the baseline

Score recovers to **96+/100** after P1 gaps are resolved. Full staging certification target: **98/100**.

8 — NEXT STEPS (CONTROLLED PILOT READINESS)

#	Step	Blocker for Staging?
1	Fix G1: Create app/403/page.tsx in apps/admin_web	Yes
2	Fix G4: Add supportAuditLogs to supportRepository.ts	Yes
3	Fix G2/G3/G5: Port pagination utilities and apply to all 10 queues	Yes
4	Fix G6–G14: Port scripts, env template, package.json scripts, tsx dep	No (pre-pilot)
5	Run npm run staging:certify — must pass clean	No (gate)
6	Seed staging Firestore: npm run seed:staging-admins && npm run seed:staging-queues	No
7	Role-by-role access test using STAGING_SIGN_OFF_CHECKLIST.md	No
8	M-Pesa sandbox B2C test against staging payout queue	No
9	Complete STAGING_SIGN_OFF_CHECKLIST and obtain owner sign-off	No
10	Promote to controlled pilot environment	No
