

Release 1.0E Final GA Readiness Validation Report

Daniel Macharia <danielmacharia43@gmail.com> Thu, 9 Jul at 22:49
To: <daniel@ics.ac.ke>

I cannot truthfully execute Release 1.0E as a completed GA validation because the developer evidence for Releases **1.0A–1.0D** has not yet been submitted in this conversation.

The latest Production Readiness Review found **9 Critical**, **13 High**, and **14 Medium** findings, and explicitly concluded that YohPal Live was **not ready for general availability** until those launch blockers are removed.

YohPal Live — Production Readiness Review.pdf

Below is the official **Release 1.0E Final GA Readiness Validation Report** for developers and the Release Review Board to complete.

YOHPAL LIVE RELEASE 1.0E — FINAL GA READINESS VALIDATION REPORT

1. Certification Objective

Confirm whether YohPal Live is eligible for General Availability after completion of Releases 1.0A–1.0D.

2. Required Evidence

Release	Required Evidence	Status
1.0A	Account, navigation, Crashlytics, password reset, route tests	Pending
1.0B	Wallet reconciliation, gift validation, rewarded ad verification, Firestore hardening	Pending
1.0C	Search/Live Discovery wiring, feed retry, pagination, mute, accessibility, LiveKit reconnect	Pending
1.0D	Duplicate pipeline removal, analytics consolidation, CI, automated tests	Pending

3. Critical Findings Closure

Critical Finding	Closure Evidence	Status
No sign-out UI	Pending	☐
Analytics route crash	Pending	☐
No crash reporting	Pending	☐
No password reset	Pending	☐
Spoofable rewarded ads	Pending	☐
Client-controlled gift amount	Pending	☐
No wallet reconciliation UX	Pending	☐
Hardcoded production URLs	Pending	☐
Weak Firestore writes	Pending	☐

4. High Findings Review

Area	Required Result	Status
Auth validation	Friendly validation and errors	☐
Live reconnect	Connection loss surfaced and recoverable	☐
Search navigation	Reachable from app	☐
Live Discovery	Reachable from app	☐
Feed retry	Retry available	☐
Accessibility	Feed semantics added	☐
Test coverage	Auth/feed/wallet/live tests added	☐
Duplicate video stacks	Removed	☐

5. Validation Commands

```
```bash
flutter clean
flutter pub get
flutter analyze
flutter test

cd functions
npm run build
npm test
```

6. Device Validation

--	--	--

Platform	Required Evidence	Status
Android	Screenshots/logs/test report	<input type="checkbox"/>
iPhone	Screenshots/logs/test report	<input type="checkbox"/>

7. Release Review Board Decision

Choose one:

- GO — General Availability approved
- CONDITIONAL GO — limited rollout approved
- NO-GO — blockers remain

8. Current Independent Recommendation

NO-GO for GA until evidence is submitted and verified.
