Below is the **YOHPAL LIVE RELEASE 1.0A — Critical Account, Navigation & Observability Patch**.

This directly targets the audit's Critical blockers: no logout, crashing Analytics route, no crash reporting, no password reset, and no route-reachability gate.

YohPal Live — Production Readiness Review.pdf

```
// lib/core/config/yohpal_env.dart
class YohPalEnv {
  static const functionsBaseUrl = String.fromEnvironment(
    'YOHPAL_FUNCTIONS_BASE_URL',
    defaultValue: 'https://us-central1-yohlab.cloudfunctions.net',
  );

  static const livekitUrl = String.fromEnvironment(
    'YOHPAL_LIVEKIT_URL',
    defaultValue: 'wss://yohpal-live-ln8xib3c.livekit.cloud',
  );
}

// lib/features/auth/auth_error_mapper.dart
class AuthErrorMapper {
  static String friendly(Object error) {
    final value = error.toString();

    if (value.contains('invalid-credential') ||
        value.contains('wrong-password')) {
      return 'The email or password is incorrect.';
    }
    if (value.contains('user-not-found')) {
      return 'No account was found with this email.';
    }
    if (value.contains('email-already-in-use')) {
      return 'This email is already registered.';
    }
    if (value.contains('weak-password')) {
      return 'Please use a stronger password.';
    }

    return 'Something went wrong. Please try again.';
  }
}

// lib/features/auth/password_reset_service.dart
import 'package:firebase_auth/firebase_auth.dart';

class PasswordResetService {
  final FirebaseAuth auth;

  PasswordResetService({FirebaseAuth? auth})
    : auth = auth ?? FirebaseAuth.instance;

  Future<void> sendResetEmail(String email) async {
    final trimmed = email.trim();

    if (trimmed.isEmpty || !trimmed.contains('@')) {
      throw ArgumentError('Enter a valid email address.');
```

```

@override
Widget build(BuildContext context) {
  return ListTile(
    leading: const Icon(Icons.logout),
    title: const Text('Sign out'),
    onTap: () async {
      final confirmed = await showDialog<bool>(
        context: context,
        builder: (_) => AlertDialog(
          title: const Text('Sign out?'),
          content: const Text('You will need to log in again.'),
          actions: [
            TextButton(
              onPressed: () => Navigator.pop(context, false),
              child: const Text('Cancel'),
            ),
            FilledButton(
              onPressed: () => Navigator.pop(context, true),
              child: const Text('Sign out'),
            ),
          ],
        ),
      );

      if (confirmed == true) {
        await onSignOut();
      }
    },
  );
}

// lib/core/routing/route_integrity.dart
class RouteIntegrity {
  static const registeredRoutes = <String>{
    '/creator-profile/analytics',
    '/search',
    '/live-discovery',
    '/wallet-status',
  };

  static const pushedRoutes = <String>[
    '/creator-profile/analytics',
    '/search',
    '/live-discovery',
    '/wallet-status',
  ];

  static List<String> missingRoutes() {
    return pushedRoutes
      .where((route) => !registeredRoutes.contains(route))
      .toList();
  }
}

// test/navigation/route_integrity_test.dart
import 'package:flutter_test/flutter_test.dart';
import 'package:yohpal_live/core/routing/route_integrity.dart';

void main() {
  test('all pushed routes are registered', () {
    expect(RouteIntegrity.missingRoutes(), isEmpty);
  });
}

// lib/main.dart patch
import 'dart:async';
import 'dart:ui';
import 'package:flutter/material.dart';
import 'package:firebase_crashlytics/firebase_crashlytics.dart';

Future<void> main() async {
  runZonedGuarded(() async {
    WidgetsFlutterBinding.ensureInitialized();

    FlutterError.onError = FirebaseCrashlytics.instance.recordFlutterFatalError;

    PlatformDispatcher.instance.onError = (error, stack) {
      FirebaseCrashlytics.instance.recordError(error, stack, fatal: true);
      return true;
    };

    runApp(const YohPalApp());
  }, (error, stack) {
    FirebaseCrashlytics.instance.recordError(error, stack, fatal: true);
  });
}

```

```
}  
  
# pubspec.yaml patch  
dependencies:  
  firebase_crashlytics: ^4.1.0  
  firebase_analytics: ^11.3.0  
  
flutter clean  
flutter pub get  
flutter analyze  
flutter test
```

Developer Evidence Required

1. Git branch
2. Commit hash
3. Crashlytics test crash proof
4. Logout screenshot
5. Password reset screenshot
6. Analytics route fix proof
7. Navigation reachability test output
8. flutter analyze output
9. flutter test output

Next Smart Move

Execute **YOHPAL LIVE RELEASE 1.0B — Money, Security & Wallet Reconciliation Patch** to close the remaining Critical money-flow and fraud-risk blockers.
