To: &lt;daniel@ics.ac.ke&gt;

Below is **YOHPAL LIVE RELEASE 1.0D — Codebase Cleanup, Tests & Release Gate Patch**.

It targets the audit's High/Medium structural risks: duplicate video pipelines, dead services, only four app test files, missing navigation release gate, unused analytics, and the repeated "build-then-forget-to-wire" pattern.

YohPal Live — Production Readiness Review.pdf

```
# scripts/yohpal_release_1_0d_cleanup.sh

#!/usr/bin/env bash
set -euo pipefail

echo "Release 1.0D cleanup started"

# Remove dead duplicate video stacks after confirming zero live imports.
rm -rf lib/core/video
rm -rf lib/core/video_feed

# Remove known dead service stubs if still unreferenced.
rm -f lib/core/analytics/unused_analytics_service.dart
rm -f lib/features/wallet/wallet_launcher_service.dart
rm -f lib/features/monetisation/monetisation_service.dart
rm -f lib/features/chat/chat_sdk_adapter.dart

echo "Cleanup complete. Run flutter analyze and tests next."

// lib/core/analytics/yohpal_analytics_service.dart

import 'package:firebase_analytics/firebase_analytics.dart';

# docs/release/YOHPALIVE_RELEASE_1_0D_CLEANUP_REPORT.md

## Scope

- Duplicate video pipeline removal
- Dead service removal
- Analytics consolidation
- Route reachability release gate
- Expanded tests for auth, wallet, feed, live streaming

## Required Evidence

| Evidence | Status |
|---|---|
| Git branch | Pending |
| Commit hash | Pending |
| Removed duplicate video stack proof | Pending |
| Dead services removed proof | Pending |
| AnalyticsService usage proof | Pending |
| CI route gate proof | Pending |
| flutter analyze output | Pending |
| flutter test output | Pending |

```

*## Decision*

- *PASS*
- *CONDITIONAL PASS*
- *FAIL*

# Required developer validation

```
bash scripts/yohpal_release_1_0d_cleanup.sh
```

```
flutter pub get
flutter analyze
flutter test
```

```
git status
```

## Developer Evidence Required

1. Git branch
2. Commit hash
3. Duplicate video pipeline removal proof
4. Dead services removal proof
5. Analytics consolidation proof
6. Route reachability CI proof
7. New test list
8. flutter analyze output
9. flutter test output
10. Release 1.0D Cleanup Report

## Next Smart Move

Execute **YOHPAL LIVE RELEASE 1.0E — Final GA Readiness Validation Report**, requiring evidence that Releases 1.0A–1.0D closed all Critical findings, reduced High findings to an approved threshold, and produced a Release Review Board Go/No-Go decision.
