YOHPAL LIVE CREATOR STUDIO RELEASE 1.1A

Video Creation Foundation

After reviewing the current Creator Studio, I believe **this should become YohPal's biggest competitive advantage.**

TikTok, CapCut, Instagram and YouTube all separate editing from the rest of the creator journey.

YohPal should instead build an **AI-first Creator Operating System** where recording, editing, AI, commerce, jobs, learning and monetisation happen inside one workflow.

The objective should **not** be to build another CapCut.

The objective should be:

Build the smartest creator platform in Africa.

Executive Vision

The Creator Studio should become

YohPal Camera

↓

AI Director

↓

Timeline Editor

↓

AI Production Studio

↓

Commerce & Jobs Objects

↓

AI Publishing Assistant

↓

One-Tap Publishing

↓

Creator Analytics

↓

Wallet Revenue

This entire workflow should happen without leaving YohPal.

Release Architecture

Creator Studio

|

- └ Camera Studio
 - └ Timeline Studio
 - └ Audio Studio
 - └ Caption Studio
 - └ AI Studio
 - └ Commerce Studio
 - └ Publishing Studio
 - └ Analytics Studio
 - └ Project Manager
-

PHASE A — YOHPAL CAMERA

Current Gap

Currently:

Gallery upload works.

Camera recording is incomplete.

Required Camera

Professional Recording

- Front camera
 - Rear camera
 - Camera switching
 - Flash
 - Torch
-

Recording

- Pause
 - Resume
 - Delete last clip
 - Multi-clip recording
 - Hands-free mode
-

Timing

- 3 second timer
 - 5 second timer
 - 10 second timer
 - Countdown voice
-

Recording Modes

- Normal
 - Slow Motion
 - Fast Motion
 - Time Lapse
 - Hyperlapse
 - Loop
-

Recording Quality

- 480P
 - 720P
 - 1080P
 - 4K (supported devices)
-

Camera Assist

- Grid
 - Horizon level
 - Face detection
 - Smile capture
 - Auto focus
 - Tap focus
-

Disruptive Feature

AI Director

Before recording:

Creator simply says

“I want to advertise my restaurant.”

AI immediately produces

- Shot list
 - Camera angles
 - Scene duration
 - Suggested transitions
 - Voice script
 - Text overlays
 - Thumbnail ideas
 - Best hook
 - CTA
-

Required Codebase

```
class AiDirectorProject {  
  
    final CreatorObjective objective;  
  
    final List<ShotInstruction> shots;  
  
    final Script script;  
  
    final List<TextOverlay> overlays;  
  
}
```

PHASE B — TIMELINE EDITOR

Current status:

Only upload.

No editing.

Required

Timeline

Unlimited clips

Zoom timeline

Frame accurate editing

Editing

Trim

Split

- Merge
- Delete
- Duplicate
- Reorder
- Copy
- Paste
- Undo
- Redo

Clip Controls

- Speed
- Reverse
- Freeze frame
- Crop
- Rotate
- Mirror
- Scale
- Volume
- Fade
- Opacity
- Blur

Preview

- Live preview
- Frame preview
- Before / After

Required Codebase

```
class TimelineClip {  
  
    Duration trimStart;  
  
    Duration trimEnd;  
  
    double speed;  
  
    double volume;  
  
    Rotation rotation;  
  
    Crop crop;  
  
}
```

PHASE C — AUDIO STUDIO

- Current
- No audio editing.

Required

Music Library

Voice-over

Noise reduction

Echo reduction

Audio ducking

Beat detection

Beat synchronization

Fade in

Fade out

Audio trim

Audio split

Sound effects

Trending music

Original sounds

Saved sounds

Favorites

Copyright checker

Disruptive

AI Music Recommendation

Creator selects

Donation

Business profile

Chat

AI Ask

Required Codebase

```
class TimelineObject {  
  
    Duration appearAt;  
  
    Duration disappearAt;  
  
    ObjectType type;  
  
    String objectId;  
  
}
```

PHASE G — PUBLISHING STUDIO

Current

AI checklist exists.

Need enforcement.

Required

Publishing checklist

Copyright

Community policy

Music rights

Thumbnail

Caption

Hashtags

Objects

Accessibility

Language

Age restriction

Visibility

Scheduling

Cross-post

Draft

Required

Publishing blocked until

Everything passes.

PHASE H — PROJECT MANAGER

Current

None.

Required

Projects

Folders

Drafts

Autosave

Version history

Undo history

Recover deleted project

Offline editing

Cloud sync

PHASE I — CREATOR ANALYTICS

Current

Very limited.

Need

Editing analytics

Publishing analytics

AI usage

Revenue

Video performance

Hook performance

Caption performance

Thumbnail performance

Object CTR

Music performance

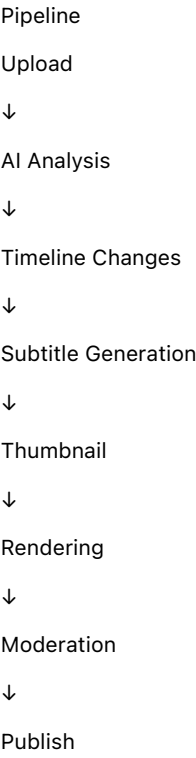

AI recommendation accuracy

PHASE J — AI PRODUCTION PIPELINE

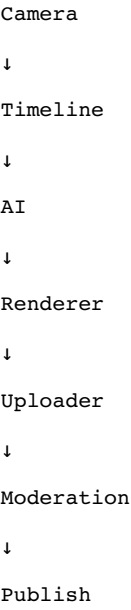

Current

AI gives suggestions.

Need execution.

Architecture

Estimated Readiness

Module	Current	After Release 1.1A
Camera	20%	95%
Timeline	5%	90%

Audio	5%	90%
Captions	30%	95%
AI	65%	95%
Commerce Objects	5%	95%
Publishing	60%	98%
Projects	5%	95%
Analytics	35%	90%

My Strongest Recommendation

The biggest opportunity is to make **every YohPal video actionable**.

Instead of ending with:

“Like, comment and subscribe.”

A YohPal creator should be able to end with:

- **Apply for this Job**
- **Book this Course**
- **Buy this Product**
- **Claim this Offer**
- **Donate**
- **Message the Creator**
- **Ask YohPal Brain**
- **Join this Live**
- **Hire this Business**
- **Follow this Institution**

Each action should appear as an interactive object at a chosen timestamp, with conversion analytics flowing back to the creator. That would make YohPal videos not only entertaining, but measurable business, education and employment journeys—something that clearly differentiates the platform from conventional short-video apps.

Next Smart Move

Build YOHPAL LIVE CREATOR STUDIO RELEASE 1.1B — AI Production Engine, focused on connecting the existing AI recommendation services (captions, hooks, hashtags, viral score, thumbnail ideas and trim suggestions) to actual media rendering, synchronized subtitles, timeline edits, and production-ready exports, while introducing Creator Digital Twin workflows and timestamped interactive ecosystem objects (Jobs, Market, Wallet, Courses and AI) with end-to-end conversion analytics.
