YOHPAL LIVE CREATOR STUDIO RELEASE 1.1B
AI PRODUCTION ENGINE — MASTER BLUEPRINT

Vision

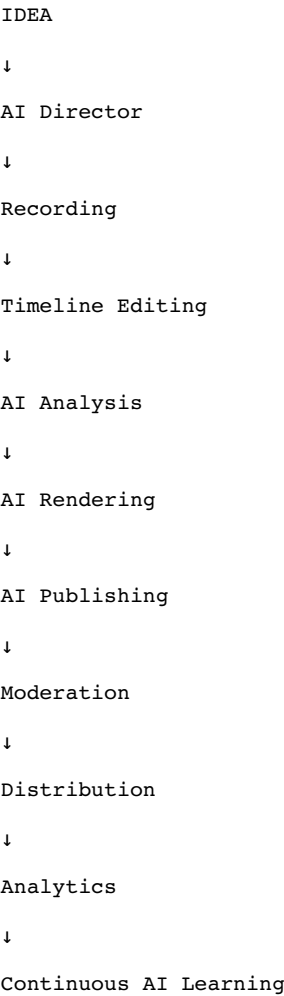

This release transforms YohPal from **an app that uploads videos** into **an AI production company inside every creator's phone**.

Today's short-video apps mostly help people **edit** videos.

YohPal should help people **produce, optimize, publish, monetize, sell, hire, teach, and grow businesses** through AI.

The AI Production Engine should become the heart of YohPal Live.

AI Production Pipeline

PHASE 1 — AI DIRECTOR

Current State

AI provides:

- Caption ideas
- Hook ideas
- Hashtags
- Viral score
- Thumbnail ideas
- Trim suggestions

It does **not** yet direct production.

New AI Director

Before recording begins, AI should ask:

“What do you want this video to achieve?”

Examples:

- Sell my product
 - Find employees
 - Get more followers
 - Promote my business
 - Advertise a course
 - Announce an event
 - Teach something
 - Recruit students
 - Find clients
 - Tell a story
-

Then AI automatically creates:

Storyboard

Scene 1

Wide shot

4 seconds

↓

Scene 2

Product close-up

5 seconds

↓

Scene 3

Call to action

6 seconds

Camera Instructions

Example

Look directly into camera.

Smile.

Hold product.

Pause.

Zoom.

Move closer.

Voice Script

Example

Hi everyone.

Today I'd like to introduce...

...

Teleprompter

Automatically scrolls script.

Overlay Suggestions

Show:

Product

Price

Discount

Location

Phone

Website

QR code

Required Codebase

```
class AiDirectorPlan {
    CreatorObjective objective;
    List<ScenePlan> scenes;
    Script script;
    List<TimelineOverlay> overlays;
    ThumbnailPlan thumbnail;
}
```

PHASE 2 — AI ANALYSIS ENGINE

After recording

AI analyses

Every frame

Every second

Every word

AI detects

Long silence

Poor lighting

Shaky camera

Weak hook

Bad ending

Low energy

Poor eye contact

Noise

Empty sections

Duplicate sections

Required Codebase

```
class AiVideoAnalysis {  
  
double hookStrength;  
  
double speakingEnergy;  
  
double shakeScore;  
  
double lightingScore;  
  
double clarity;  
  
double viralPrediction;  
  
}
```

PHASE 3 — AI AUTO EDITOR

Instead of only suggesting trims,
AI should actually edit.

Automatically

- Trim
 - Split
 - Merge
 - Remove silence
 - Remove “umm”
 - Remove pauses
 - Reorder clips
 - Improve beginning
 - Improve ending
-

Creator sees

Required Codebase

```
class AiEditAction {  
  
EditType type;  
  
Duration start;  
  
Duration end;  
  
double confidence;  
  
}
```

PHASE 4 — AI SUBTITLE ENGINE

Current

Caption ideas.

Need

Real subtitles.

Generate

Speech recognition

↓

Word timing

↓

Subtitle animation

↓

Translation

↓

Export

Subtitle Styles

TikTok

Instagram

Minimal

Cinema

Business

Education

Kids

Supported

Burn-in

SRT

VTT

ASS

Disruptive

AI highlights

Important words.

PHASE 5 — AI THUMBNAIL ENGINE

Current

Ideas only.

Need

Actual generation.

AI analyses

Face

Smile

Emotion

Brightness

Objects

Text

Generate

10 thumbnails

↓

CTR prediction

↓

Choose best

Required Codebase

```
class GeneratedThumbnail {  
  
File image;  
  
double predictedCTR;  
  
}
```

PHASE 6 — AI AUDIO ENGINE

Current

Very little.

Need

Noise reduction

Voice enhancement

Echo removal

Volume normalization

Beat detection

Music recommendation

Music synchronization

Sound effects

Voice cloning

Voice-over

AI Recommendation

Restaurant

↓

Jazz

Business

↓

Corporate

Comedy

↓

Trending

PHASE 7 — AI OBJECT ENGINE

Nobody currently has this integrated deeply.

At second

00:04

```
Required Codebase

class InteractiveTimelineObject {

    Duration appear;
    Duration disappear;

    ObjectType type;

    String id;

}
```

PHASE 8 — AI PUBLISHING ENGINE

Current

AI checklist.

Need

Publishing Intelligence.

Checks

Copyright

Community rules

Audio rights

Thumbnail

Caption

Objects

Accessibility

Language

Audience

Monetization

If everything passes

↓

Publish

Else

↓

Explain

↓

Fix

Required Codebase

```
class PublishingDecision {  
  
    bool approved;  
  
    List<String> blockers;  
  
    List<String> recommendations;  
  
}
```

PHASE 9 — CREATOR DIGITAL TWIN

Most disruptive feature.

Creator can ask

“Edit like my previous viral videos.”

AI analyses

Creator history

↓

Learning

↓

Produces

Similar editing style

AI remembers

Favourite transitions

Music

Hooks

Thumbnail styles

Captions

Publishing time

Required Codebase

```
class CreatorTwin {  
  
    CreatorProfile profile;  
  
    EditingStyle style;  
  
    AudienceInsights audience;  
  
}
```

PHASE 10 — AI ANALYTICS

Instead of

Views

Likes

Need

Hook retention

Thumbnail CTR

Caption quality

Music effectiveness

Editing score

Scene performance

Object CTR

Affiliate revenue

Wallet revenue

Jobs applied

Products sold

Courses enrolled

AI recommendation accuracy

Dashboard

Brain Learning

Estimated Readiness After Release 1.1B

Module	Current	Target
AI Director	20%	95%
AI Editing	35%	95%
AI Rendering	10%	90%
AI Captions	30%	98%
AI Audio	10%	90%
AI Objects	5%	98%
AI Publishing	60%	99%
Creator Twin	5%	95%
AI Analytics	35%	95%

Required Codebase

Production Job Contract

```
enum AiProductionStage {
    queued,
    analysing,
    editing,
    rendering,
    subtitleGeneration,
    thumbnailGeneration,
    moderation,
    publishing,
    completed,
    failed,
}

class AiProductionJob {
    final String jobId;
    final String creatorId;
    final String projectId;
    final AiProductionStage stage;
```

```
final double progress;
final List<String> completedSteps;
final List<String> pendingSteps;
final String? failureReason;

const AiProductionJob({
  required this.jobId,
  required this.creatorId,
  required this.projectId,
  required this.stage,
  required this.progress,
  required this.completedSteps,
  required this.pendingSteps,
  this.failureReason,
});
}
```

Timeline Export Contract

```
class TimelineExport {
  final String projectId;
  final Duration duration;
  final List<VideoClipEdit> clips;
  final List<CaptionTrack> captions;
  final List<AudioTrackEdit> audioTracks;
  final List<InteractiveTimelineObject> objects;
  final ThumbnailPlan thumbnail;

  const TimelineExport({
    required this.projectId,
    required this.duration,
    required this.clips,
    required this.captions,
    required this.audioTracks,
    required this.objects,
    required this.thumbnail,
  });
}
```

Final Recommendation

The largest opportunity is **not** to compete on filters or visual effects alone.

YohPal should become the **first platform where every video is an intelligent business asset**.

A creator should be able to upload one video and have AI automatically:

- Edit it.
- Generate subtitles.
- Recommend and synchronize music.
- Improve the opening hook.
- Produce multiple thumbnails.
- Translate it.
- Attach interactive Jobs, Market products, Courses, Wallet offers or AI actions at specific timestamps.
- Validate publication readiness.
- Publish it.
- Measure every interaction, conversion and revenue event.

That transforms a short video from passive entertainment into a measurable creator, commerce, education and employment journey—an area where YohPal can genuinely differentiate itself.

Next Smart Move

Build **YOHPAL LIVE CREATOR STUDIO RELEASE 1.1C — REAL-TIME AI CO-CREATION**, enabling YohPal Brain to collaborate with creators while they record and edit. The AI should provide live coaching (framing, lighting, speech pace, eye contact and hook quality), suggest scene changes in real time, synchronize captions as recording progresses, recommend ecosystem objects before publication, and learn each creator's style through the Creator Digital Twin to deliver increasingly personalized production assistance.
